Why Deposit In a Savings Bank?

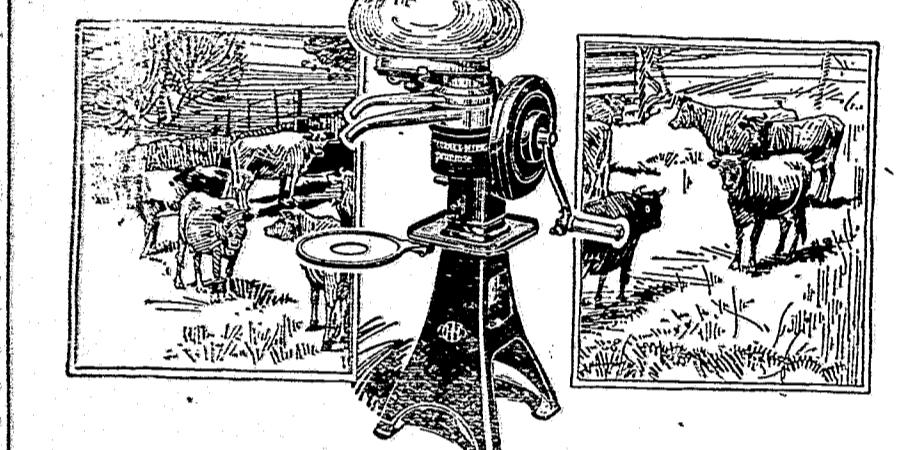

The law compels every Savings Bank to carry a
percentage of its funds into a Reserve Fund "to meet
losses if any occur."

IF YOU buy an investment and it goes wrong, YOU
lose; if the Savings Bank buys the same "investment"
and it goes wrong, it is charged to this
Reserve Fund and no depositor loses a cent.

We pay you 4 per cent. compound interest.

In the delightfully warmed moistened air sent up by the Moncrief Pipeless Furnace, you are supremely comfortable at 68 degrees. Big casings cut out drafts, big pan of water supplies air with proper moisture, same as Nature does. More comfort, more health, and less coal.

There are ten reasons why the Moncrief will benefit both your health and bank account. Come in and ask about them.

The "I Will" Spirit
BY DEAN MARQUIS

"Is My Weight Normal?"

"Is my weight normal?" seems to be one of the questions of the day oftenest put by so anxiously conscientious persons who like to conform to rule. The query should be modified, however, to "What is my weight, like competition, is a good deal a matter of individuality. Nationality, heredity, and foreordination of Providence have all their take on it. There is a rigid and inflexible standard to which every one must conform. Especially in the matter of foreordination we find ourselves up against something incorrigible. One of the most popular of the florilegia call "a sport" in a family of this ones—or one this person in a family of that ones.

Now, I am not so much as to be fat, but I am not so thin as to be a hanger-on of weight as it would get at which to shoot, then you are going to keep right on hanging away with both eyes shut. It is a law that a body unsupported falls to the ground. And it is also a law that a man unsupported by a definite purpose and resolution, drawn down by the force of circumstances until he bumps the bottom.

Women are apt to have more ups and downs in weight than men. Girls will fatten up temporarily for a year or more after they have done growing; and women who have had children, especially after a first, will gain weight rapidly. This means they lose less of the heat from the food by radiation, since the superficial area of the man is about twice that of the woman.
